About Me

I am Felix Octaniel Telaumbanua, an active Informatics student at Multimedia Nusantara University (UMN). I have a strong interest in information technology, particularly in programming and application development. As a detail-oriented and logical thinker, I strive to solve problems effectively and continuously improve my technical skills and knowledge in the tech industry. With a hardworking attitude, I aspire to contribute to the development of impactful technological innovations in the future.

Education

| 2023 - Present| Multimedia Nusantara University | Bachelor of Informatics

Currently pursuing a degree in Informatics with a focus on technology development, programming, and innovation in information technology.

Experience

| Coordinator Website Development | Front-end & Back-End

Responsible for planning, developing, and coordinating the website development team. Managed both front-end user interface and back-end system logic, ensuring seamless integration between design and functionality.

| assistant laboratory Informatics| Operating Systems

Assisted lecturers during Informatics laboratory sessions by guiding students through programming exercises, software usage, and basic troubleshooting. Provided instructional support to help students understand technical concepts and complete lab assignments effectively.

| 2024 - Present| Game Development Club | Programming Instructor

Teach C# programming in Unity and game development to club members. Focused on building technical skills in interactive and innovative game creation, while guiding members to understand programming and game design concepts.
